

## Sonic Design Press Information

November 18th,2011

# Sonic Design opens the new window for export/import trade and overseas agencies

Sonic Design Co.,LTD opens the new window section for export/import trade and for overseas agencies at *The 42nd Tokyo Motor Show 2011* from December 3rd to 11th, 2011.

Sonic Design products are made by special materials and parts, and they are assembled by hand in Japan with full of craftsmanship.

Therefore, production capacity is very limited, and the sales of Sonic Design products have been limited only in Japan.

On the other hand, Sonic Design received many customer requests from foreign countries for the sales of Sonic Design products in each country.

To meet with these customer requests from foreign countries, Sonic Design decided to open the new window section for the business partner in overseas.

The new window section will explain about our company, products, and the deals by Japanese and English.
